

Energy Strikeforcesm

At Got Green Energy?, we specialize in energy management and reduction. With a wide host of energy services, we developed Energy Strikeforcesm to provide clients with one simple solution. The only energy solution you'll need...

Here is what we cover:

Energy Central
Confused about how to reduce your energy consumption and go green? Let us help you save money on energy on your path to sustainability. We have a history of success helping companies and organizations achieve their green goals while lowering the energy bill.

Cost Effective
For many companies, energy efficiency is one of the easiest ways to save money. We focus on finding improvements that will pay for themselves in as little as one year. Reduce the actual cost of energy as well via comprehensive power procurement methods.

Personalized
Every client has different needs. We customize the best solution to you. Our focus is on saving you money and helping you go green along the way.

With our comprehensive approach, we are able to educate our clients to make cost effective and energy smart decision both in the short term and the long term. Our energy audits detail the specifics needed to optimize your building systems. We can help you obtain LEED certification as well. We'll help you get the most from your green investments. We can also help you go 'carbon neutral' with carbon offsets and renewable energy certificates.

The Energy Strikeforcesm solution is all-inclusive to address your energy needs from beginning to end.
