

Unified Green Solution

The Green Embassy program provides a proven, integrated approach to reducing energy costs and becoming more sustainable. Let us show you how.

Cost Effective

What if your Embassy could save over \$750,000 over ten years by investing \$62,000? Those are actual savings one of our Embassy clients will experience from replacing lighting based on our recommendations. Imagine paying for your entire sustainability program with energy savings. Although savings will vary, most clients experience significant long-term energy reductions and reduced environmental impact.

Customized

Large or small, new or old, every Embassy has the potential for reduced energy consumption and greener operations. Through the Green Embassy Program, we help to find the best solution for your building.

Green Embassy Program

At Got Green Energy, we've been helping clients save money on energy and become more sustainable since 2007. Our Green Embassies Program was created to help address the unique requirements of Embassies.

Our expertise will help you:

- ✓ **Educate your employees on sustainability**
 - We'll help your employees understand topics like climate change, LEED, energy efficiency, and current policies
- ✓ **Develop a carbon footprint analysis**
 - Understand what the environmental impact is of your Embassy, and how you can reduce it.
- ✓ **Identify areas of opportunity for energy reduction**
 - Whether in lighting, heating and air conditioning, or other areas, we'll find ways to reduce your usage.
- ✓ **Assist with LEED certification**
 - We can help your Embassy with pursuing LEED silver, gold or platinum certification.
- ✓ **Achieve carbon neutrality if desired**
 - Would you like your Embassy to have zero environmental impact? We can help.
- ✓ **Publicize your Embassy's achievements**
 - Upon completion of the Green Embassy Program, we will submit a press release on your behalf, in addition to helping to provide opportunities for the Embassy to share its success.

The Green Embassy Program has been designed to help you show the world that you're environmentally focused while providing significant energy savings.

Ask us how it works.
